Must-Have Varieties

Each year, we have some top performers getting recognized in our collection based on overall demand and variety performance. These must-have varieties come out on top in terms of performance in the garden, popularity with the consumer, and profits for the retailer and grower – and this year's selections are sure to be in high demand.

The PSI Advantage:

At Plant Source International, we're blessed with an exceptional staff of talented growers, dynamic breeding partners, and a customer service staff dedicated to making your job easier. It's a perfect combination of talent, passion, and a demand for quality that makes PSI a solution-oriented supplier to your programs.

Plant Source International is a leading and independent producer of vegetatively propagated plant varieties. This independence allows us to select and offer only what we see as the best solution-oriented and profit-making plants for our customers. We take pride in offering the industry a broad selection of clean, healthy cuttings from some of the industry's top breeding programs, as well as many popular non-patented items. Our dynamic unrooted cutting program offers North American growers a wide selection of genetics from Danziger, Florensis, Marcum, PAC-Elsner, PlantHaven, Suntory Flowers, Terra Nova, Volmary and Westhoff.

Each year we make great strides in partnering with our broker companies to make ordering easier through online systems and make great improvements with our FedEx Trade Network to make sure our customers receive quality cuttings in a timely manner.

As we look forward to the 2020 season, we are excited about our new variety additions and quality improvements to the PSI line. We invite you to give these exciting new plants a try, and are confident that your customers will be thrilled!

Geraniums
Regal + Scented

ANGELEYES®
Regal Geranium

Pelargonium domesticum

The Angeleyes series brings an unique flower form unlike any other in the class. The blooms have a rich, velvety appearance like a regal, but are born in a single, viola-like form. The energy efficient crop can be grown cool in the spring, and will continue to bloom for the consumer throughout the summer. Plants look best in small container sizes like 306-packs and 4-inch, but can be done in larger pots and patio containers.

ANGELEYES® Patio Orange
Regal Geranium

ANGELEYES® Picotee
Regal Geranium

PINKERBELL® *Geranium*

Pelargonium domesticum

Pinkerbell is a stunning regal hybrid with a more compact habit than the other lines, but full of flowers that come nonstop throughout the summer months. Pinkerbell does not require cooling, but can be grown under traditional zonal geranium conditions as long as they are kept dry.

PINKERBELL®
Regal Geranium

CANDY FLOWERS® *Regal Geranium*

Pelargonium domesticum

Candy Flowers bloom early and keep blooming throughout the summer – a perfect complement to your existing spring plants program. The floriferous plants come in very impressive colors and the medium habit makes Candy Flowers a real standout in the store and for gardeners. Easier to produce than other regal type geraniums, Candy Flowers will tolerate more heat once established and will initiate flowers up to 50°F. While chilling can be beneficial, it is not needed for this series to produce full, blooming plants. The versatile line is well suited to all containers from quarts to 10-inch patio planters.

CANDY FLOWERS® Bicolor
Regal Geranium

CANDY FLOWERS® Bright Red
Regal Geranium

CANDY FLOWERS® Dark Red
Regal Geranium

CANDY FLOWERS® Peach Cloud
Regal Geranium

ARISTO® *Regal Geranium*

Pelargonium domesticum

This series of regal geraniums has been selected for their ease of rooting and the uniformity of blooms across the colors. The plant habit allows this series to be utilized in pot sizes from quarts to 10-inch. Most Aristo varieties will continue to flower throughout the summer for consumers, making them both a high value potted plant as well as a garden item.

SCENTED COLLECTION *Geranium*

Pelargonium hybrids

Plant Source International is the undisputed leader for the production of scented geranium unrooted cuttings. Grown primarily for their distinctively scented foliage, our collection also has varieties with highly ornamental features, such as Lady Plymouth with the variegated foliage and Lemona that has a brightly citrus scent paired with the heaviest flowering scented geranium available.

Spring
Plants

GRANDAISY® *Argyranthemum*

Argyranthemum hybrid

Grandaisy Argyranthemum are a complete game-changer for the class. These varieties display oversized flowers for maximum color. The series fits the classic early spring market of Argyranthemum, but the plants also have greatly improved heat tolerance for month after month of consumer enjoyment.

ANGELOS® *Angelonia*

Angelonia angustifolia

Angelos varieties are prized as the finest angelonia on the market. These vertical accent plants have massive blooms on well-branched, upright plant habits. The extra large blooms are densely packed on the flower spikes and thrive in the harshest summer conditions. Use Angelos angelonia as the highlight in your summer combination container gardens or massed in landscape plantings.

Bracteantha bracteatum

Eager to reinvent the category of strawflowers, we're excited to offer the vastly superior Cottage series of bracteantha. Combining the most disease-resistant genetics available with all-season durability, these plants mean success for the gardener. The colors are matched perfectly in production and can easily be mixed in larger containers for 4-in-1 color combinations for spring through autumn sales.

CALITASTIC®
Calibrachoa

Calibrachoa hybrid

Incredibly uniform in habit and flower timing, these calibrachoa set the new bar for grower expectation. Very early to flower, all varieties flower at 11 hours critical daylength and stay open and in flower under low light conditions, making these a great line for retailing from early spring and continuing throughout the season.

CHAMELEON®
Calibrachoa

Calibrachoa hybrid

Chameleon marks an industry-first for Calibrachoa breeding. The plants continually change color throughout the season, reacting to light levels, daylength and other seasonal factors. Blooms are not fading, but rather opening with different expressions based on environmental factors, so consumers always have a multicolored plant that changes dominant hues from season to season. Chameleon provides gardeners a unique blend of colors on a single plant which is not found in other traditional bedding plants. These vigorous varieties have outstanding garden performance and season-long durability.

CANDY SHOP™
Calibrachoa

Calibrachoa hybrid

From the original Candy Bouquet® comes a series of truly unique brushwork-pattern bicolors. The flowers have bright, fluorescent colors with a popping, irregular starburst coming from the center of each flower. Candy Shop varieties have early flowering times and semi-trailing habits, making them a perfect pick for cheerful spring baskets or as a component to combination containers.

FLORIGLORY®
Mexican Heather

Cuphea hyssopifolia

There is no competition for these new Mexican Heathers. The FloriGlory series of cuphea has 5x the flower power with excellent garden vigor compared to the industry standards, Allyson and White.

FloriGlory Diana was named a 2018 All-American Selection Winner.

FloriGlory Corazón is a unique addition to the family with an extremely dense habit and oversized blooms, much larger than anything we've seen before. An excellent addition to rock gardens and combination planters.

ESCENTIAL™
Nemesia

Living up to their namesake, these nemesias are essential for scent in the garden. Large flowers with bold colors and intense fragrance make these a staple in the garden. And Escential varieties are the most heat-tolerant nemesia on the market today, providing endless color from early spring through autumn.

IMPACIO® Red
New Guinea Impatiens

IMPACIO®
New Guinea Impatiens

Impatiens hybrid

Impacio New Guinea Impatiens have great attributes for the grower and gardener alike. Impacio was bred to withstand cooler greenhouse temperatures in production. This means growers can offer earlier and more cost effective crops. At retail, Impacio boasts large flower sizes, uniform plant habits and a full array of colors. In the garden, Impacio has proven to be one of the most heat tolerant lines of New Guinea Impatiens available today. Definitely a winning series!

LITTLETUNIA™
Petunia

Petunia hybrid

Littletunia are all about little flowers with huge value! These plants put off a profusion of blooms throughout the season, giving maximum color impact both at retail and in the garden. And the small flower size means these plants are more resilient to rainy summers and won't have their petals collapse under water.

CRAZYTUNIA®
Petunia

Petunia hybrid

Consumers are welcoming the new additions to our core petunia collections with open arms and freshly prepped flowerbeds. While some of our sheer and shimmery classic shades are still bestsellers, there is an overwhelming demand to provide an even broader range of unique colors and patterns to create custom combinations. Our Crazytunia series range in displays from stonewash to starburst. There are neon brights, velvety blacks, pulsating duo-tones and bold confetti flashes.

Rooted Cuttings

THE FOLLOWING GROWERS ARE PRODUCING ROOTED CUTTINGS OF PSI MATERIALS:

United States:

Al's Garden Center and Greenhouses (OR)
Beds & Borders (NY)
DGI Propagators (MI)
Dupont Nursery Inc (LA)
Esbenshade Greenhouses (PA)
Galema Greenhouse (IN)
Gro-N-Sell (PA)
Knox Nursery Inc (FL)
Kube Pak Corp. (NJ)
Lucas Greenhouse (NJ)
Malmborg's Greenhouses (MN)
Mast Young Plants (MI)
Meadow View Growers (OH)
PlantPeddler (IA)
Weber Greenhouses (IN)
Welby Garden Co. (CO)
Wenke Greenhouses (MI)

Canada:

Bradford Greenhouses
Colonial Florists Ltd.
Ed Sobkowich Greenhouses Ltd.
George Sant & Son Greenhouses
Greenfield Gardens
Schenck Farms & Greenhouses

SURFINIA® Purple Starshine
Petunia hybrid

How To Order

Cutting Availability

URCs will be available weeks 30-20. For a complete listing of varieties and current availability, check the PSI website at www.plantsourceintl.com.

Royalty

All varieties denoted with a company logo or noted as protected are patented varieties, registered for plant protection or have a breeder's fee. Propagation is strictly prohibited on these varieties.

Claims

To receive consideration, claims must be reported to PSI within seven days of receiving cuttings.

Minimums

The recommended minimum for an order is 2000 cuttings. Ipomoea produced in the United States has a separate minimum of 1000 cuttings.

Minimum per variety: 100; shipped in multiples of 100.

Shipping

All orders are custom cleared in Atlanta, Miami, Toronto or Vancouver. Once cleared, shipments are delivered overnight by FedEx. Freight is included in the cutting cost.
For Canadian shipments: Phytosanitary fee may be added to the invoice; Government Agency Fees are the responsibility of the recipient.

Tags

Tags for URCs can be ordered in increments of 100 per variety for everything PSI offers. Tags are required for patented varieties, but are not automatically shipped with your order. Tags for Terra Nova genetics or varieties are required and will be shipped to the customer.

PSI Warranty

PSI warrants to the extent of the purchase price that all cuttings are sold true to name and shall conform within recognized tolerances. No further warranty is expressed or implied as to future marketability. Purchaser shall be limited to the invoice value at the time of purchase of any product as its exclusive remedy to breach of warranty.
