Garden Party

GROWER-READY SUMMER SOLUTIONS

These recommended recipes have been tested to balance in habit, vigor and form. These easy solutions for sun or shade can be finished in baskets or large containers and are sure to bring retail appeal.

1 Week 1

4 young plants planted in one pot.
10-inch container shown

2 Week 3-4

Natural growth

3 Week 6-8

Pinching

Ready for sale

Garden Party components must be ordered individually except for Garden Party in a Box mixes.

Each component should be grown separately until transplanted into the finish pot.

GARDEN PARTY TEA PARTY

GARDEN *Party*

Easy ordering for simplified combinations

GARDEN PARTY IN A BOX

Premium combination solution that's been tested for success

Components arrive together as rooted cuttings, ready to transplant and finish

Four new recipes exclusively available as Garden Party in a Box

Ideal for finishing in 10" (25cm) and larger planters and baskets

Discover the difference at DummenOrange.com

***DISCOVER OUR NEWEST
HIGHLIGHT***

GARDEN PARTY
BALLOON FESTIVAL

Balloon Party is the Garden Party with a sunny disposition: a bright yellow sun floating in a blue sky of flowers. An easy mix that's sure to win at retail.

Balloon Party est un combo Garden Party aux couleurs d'un ciel d'été; un soleil lumineux qui brille au-dessus d'un ciel bleu de fleurs. Combo facile et attrayant dans les étalages.

Balloon Party es el Garden Party que simula un escenario soleado: un sol amarillo brillante flotando en un cielo azul de flores. Una mezcla fácil, que seguro que gana en el punto de venta.

PLANT

Dümmen NA, Inc. is the owner of certain intellectual property concerning methods of producing a horticultural display, the Confetti Liner™. In particular, Dümmen NA has developed a system for rooting more than one plant variety or plant species in a single growth cell. That system is protected by US Patent No. 7,891,134. With the purchase of a CONFETTI GARDEN®™ in a box kit, growers are directly licensed under the patent for use of the contents of the kit.

ANNUALS ***A-Z***

Product Forms

Callus Cuttings

Growers experience many benefits using our callus cuttings for direct stick into finished containers. Our callus program offers 100% rooting success, uniform rooting and less shrink, and up to two-week faster production timeline than using traditional unrooted cuttings.

When direct sticking our callus cuttings to the finished container, growers save a full transplanting step in the production line. Direct sticking also allows for better light penetration at the beginning stage, yielding better branching and more flowers from the very start. Our callusing protocol also provides growers with one additional level of quality sorting to ensure ultimate uniformity in growth during the production phase.

Callus cuttings available for Pelargonium, Osteospermum, and Scaevola.

QuickTurn™

The advanced QuickTurn cutting program, unique to our SunStanding hybrid Impatiens, offers growers a more mature cutting that allows a faster finish to flowering for a quick turn, retail-ready plant.

QuickTurn cuttings are ideal for finishing in small pots and packs. The cuttings ship with a bud already initiated, so the cutting will develop roots and flowers in sync with one another. This allows the plants to flower at a much younger stage, eliminating the need for plant growth regulators or water stress to manage size during finishing.

QuickTurn cuttings can be directly stuck into packs, eliminating the need for transplanting from a liner, saving time and money. The elimination of growth regulators saves the grower cost, and allows the plant to quickly take off for the consumer or landscaper, without a lag from residual PGR.

Unrooted Cuttings

Dümmen Orange is the worldwide leader in unrooted cutting production of ornamental varieties. Our state-of-the-art facilities located around the globe are selected for the proper climate and logistics needed for each crop they supply. Rather than having a one-site-fits-all approach, we customize the assortment available from each farm to fit best with the climate and light levels, and elevation which match the production needs of the crop.

Our world class facilities, paired with highly skilled labor forces, allow us to deliver premium quality, disease-free cuttings year-round. Our strong availability ensures growers will have what they need when they need it. Growers can expect predictable yield and profitable programs for their business.

Basewell™

Dümmen Orange is constantly striving to drive innovation that brings improvements for growers around the globe. Basewell™ is the next step into the future of floriculture. The innovative Basewell technology utilizes an off-shore propagation process to deliver high quality bare-root cuttings directly to the grower.

Basewell features advanced root development and no growing media. This allows shipping of Basewell products to growers from off-shore production locations, ready to transplant directly into the finish container, saving time, labor and cost.

AutoStix

Both unrooted cuttings and Basewell are offered in AutoStix cartridges, which can be used in high-speed automatic transplanting machines. These biodegradable cartridges have been designed to enhance and guide the development of the root system while protecting the soft tissue of the URC stem during transport and transplant.

Rooted Liners

For growers looking for the easiest and fastest way to produce our genetics, Dümmen Orange offers our complete assortment as rooted liners through multiple Rooting Stations and Root-and-Sell locations.

ACALYPHA

Fuzzy booms that resemble something from a Dr. Suess book add novelty to niche retail displays

Les fleurs duveteuses qui semblent sorties tout droit d'un livre du Dr Seuss ajoutent de la fantaisie aux étalages de niche

CALIBRACHOA

***Aloha Nani | Aloha Kona | Hula
Aloha | Volcano | Bloomtastic
Lindura | Lindura Cosmos***

Dümmen Orange family of Calibrachoa

A COMPLETE COLLECTION OF CALIBRACHOA

Available in a wide range of vigor classes, the Dümmer Orange calibrachoa assortment offers growers selections for every application. Aloha Nani is our most compact option and ideal for pack and quart programs. Choose Aloha Kona for quarts and baskets, or classic Aloha for larger pots and baskets. Hula and Volcano offer a novelty flower option, and Bloomtastic has been developed for extra-large flowers and high vigor that's perfect for landscapes, large pots, and baskets.

SUN STANDING

Outstanding Anywhere

The most uniform series of sun-tolerant impatiens, period.

Uniformity across a series is something that all breeders strive for. With SunStanding Impatiens, we have achieved perfect uniformity for growers and gardeners through our innovative breeding techniques, creating new color expressions on genetically identical plants.

Understanding the SunStanding Families

Our SunStanding series is organized into four families that are genetically identical across colors within each family, making predictability for the grower and landscaper a breeze.

SunStanding Apollo

SUNSTANDING APOLLO

- Most adaptable family for all uses with the widest range of colors
- Excellent vigor appropriate for professional landscapers
- Quick Turn™ cuttings make production in small containers a breeze

This series is our most popular choice for large landscape installations, featuring intense pure colors on plants with exceptional vigor. Perfectly matched across the colors, landscapers can mix and match for designer and seasonal color combinations. The full sun and full shade tolerance of SunStanding varieties makes them a versatile option to use across all landscape beds.

SunStanding Helios

SUNSTANDING HELIOS

- Compact habits are easy for smaller retail containers
- Innovative color options have high consumer appeal
- A profusion of flowers for maximum gardener satisfaction

For growers looking for varieties suitable to smaller containers, or landscapers needing a front-of-the-border option, the Helios family offers the same characteristics as Apollo varieties, but with a 20% smaller plant habit, smaller leaves, and smaller, but more prolific flowers.

SunStanding Spot-On

SUNSTANDING SPOT-ON

- Large vigorous plant habits fill big landscape spaces
- Glowing pastel colors are well-suited for evening traffic areas
- Mounding and spreading habit for maximum coverage with minimal inputs

This is our most vigorous family in the SunStanding brand and offers gardeners and landscapers a range of glowing pastel colors, accented with a rich burgundy spot in the centers. The colors of Spot-On varieties glow in the evening and moon light, making them most suitable for homeowner backyards, restaurant patios, or wherever heavy evening traffic will be present.

SunStanding Jazzy

SUNSTANDING JAZZY

- Vibrant tropical flair with variegated foliage
- Brightens up combination containers with both leaves and flowers
- Dramatic retail appeal on the bench

Jazzy varieties add dramatic flair to the program with a bright tropical look. With intense neon colored flowers on top of brilliant lemon-lime variegated foliage, these are showstoppers on the retail bench and in large combination containers. The decorative foliage of Jazzy varieties works equally well as an ornamental addition to combos, but with the added bonus of vibrant flowers throughout the summer.

***DISCOVER OUR NEWEST
HIGHLIGHT***

SUNSTANDING® JAZZY
CORAL | 30351

Bold neon blooms paired with striking two-tone foliage lend a tropical feel to Jazzy impatiens.
Create showstopping displays in large containers and landscape beds.

De spectaculaires fleurs néon jumelées à un feuillage bicolore saisissant donnent une allure tropicale aux impatiens Jazzy. Ils composent des tableaux très remarqués en gros contenants ou dans les aménagements.

Las llamativas flores color neón combinadas con un sorprendente follaje de dos tonos, le dan un toque tropical a Jazzy impatiens. Cree espectaculares presentaciones en grandes contenedores y en jardineras.

HYBRID IMPATIENS

SunStanding®
Jazzy

Brightly variegated foliage makes Jazzy an excellent option for bringing a tropical flare to the sun or shade garden

Un feuillage panaché éclatant fait de Jazzy un choix idéal pour donner une touche tropicale au jardin, à l'ombre comme au soleil

Su brillante follaje jaspeado, hace de Jazzy una opción excelente para dar un toque tropical a jardines de sol o de sombra

All around success

A long-time grower favorite, the Potunia series of petunias features strong retail appeal when paired with bright point-of-purchase material including packs, pots, and signage

Préfééré des producteurs depuis longtemps, la série de pétunias Potunia possède un attrait irrésistible au détail quand on les présente avec le matériel de mise en marché dynamique qui comprend des pots, des packs et des affiches

Es el favorito de los productores con larga experiencia. La serie de petunias Potunia se caracteriza por un fuerte atractivo comercial cuando se combina con el llamativo material de los puntos de venta, que incluye bandejas, macetas y etiquetado

Petunia

PETUNIAS FOR EVERY APPLICATION

With a petunia series to meet every application, there’s no shortage of options to build a dynamic petunia program. Potunia® offers the most tidy, compact habit, with plants filling out as a perfectly rounded bubble. Potunia® Piccola showcases smaller, numerous flowers, and Potunia® Plus is 20% larger with the same rounded habit. For mid-range vigor with novelty flowers, Sweetunia provides a wide range of options. Choose Surprise for strong, high-vigor performance in landscape and large container applications. Choose hybrid Suntunia for a super heat-tolertant, high vigor selection for landscape, baskets, and large patio planters.

EMPRESS® SUN VERBENA
COMPACT RED | 42357

EMPRESS® SUN VERBENA
COMPACT VIOLET | 42350

EMPRESS® SUN VERBENA
COMPACT WHITE | 42361

Empress Sun is a must-have for summer-long landscape color. Selections are heat-and mildew-tolerant, with a short flower height that reduces flopping.

Pour colorer vos aménagements tout l'été, Empress Sun est indispensable. Ces sélections qui tolèrent la chaleur et résistent au blanc ont des tiges florales plus courtes pour des fleurs qui se tiennent mieux.

Empress Sun es un producto imprescindible para tener color en el jardín durante todo el verano. Las selecciones son tolerantes al calor y al mildiu, con una flor de poca altura, que ayuda a mantener la firmeza.

VERBENA

Empress[®] Sun

An incredibly uniform, vigorous series that's ideally suited for the landscape with fantastic trial performance.

Ideal for gallon production

Une série vigoureuse incroyablement uniforme, aux performances extraordinaires dans les essais, utilisée idéalement dans les aménagements. Idéale pour la production en gallon

Una serie increíblemente uniforme, vigorosa, adecuada para el diseño de jardines con estupendo rendimiento en ensayo.

Ideal para producción en maceta de galón

GROUNDBREAKING ROOTING TECHNOLOGY

SIMPLIFY PROCESSES

Basewell is an innovative product form which allows growers to bring in rooted cuttings from off shore at a fraction of the cost of rooted liners.

OPTIMIZE SPACE

Directly transplant into your finish container — no need for liner trays or propagation tunnels. Realize more production turns with less space.

SAVE LABOR

Transform your production from two steps to one. Without the need for labor-heavy manual transplanting, growers can direct stick Basewell rooted cuttings into the finish container.

WHAT IS BASEWELL™?

Basewell™ is an innovative new product that combines the benefits of unrooted cuttings (URC) and rooted cuttings (RC). With visible root development, it is more mature than a URC, making it possible to plant directly into a finish container.

Basewell™ plants can be ordered in strips or in individual cartridges, offering flexibility for transplant by AutoStix machine, ISO transplanter, or manually by hand.

We recommend processing shipments immediately upon arrival. Irrigate thoroughly after transplant to ensure good root-to-media contact, and provide shade for the first five days, or until roots reach the sides of the pot.

The strip is produced from a biodegradable material that will degrade 10 to 12 weeks after transplant.

Follow us @GrowBasewell

[GROWBASEWELL.COM](https://growbasewell.com)

TRANSPLANT

- Plant Basewell young plants directly into the finished container. Avoid damaging roots during handling.
- Use the standard number of plants per container you normally use for that crop and pot size.

GREENHOUSE ENVIRONMENT

1 – 7 days after transplant (until roots reach side of pot)	• Avoid temperature extremes. • Maintain light levels at 500 (2500 footcandles)
7 – 14 days after transplant	Increase light levels to 38,000 lux (3500 footcandles)
14 days after transplant	Adjust light level and temperature to the normal variety-specific finishing conditions.

IRRIGATION

- Water in thoroughly after planting to moisten the growing medium and ensure there is a good soil to root contact.
- Continue with light irrigations until plant is fully hydrated and roots reach side of container. Then irrigate on normal finished plant schedule.

FERTILITY

At planting	100 ppm N
After roots reach side of pot	Increase to finished recommended rate for genera and variety.
EC range	Start at 1.0 – 2.0 mS/cm based on Saturated Media Extract. Then increase as needed based on variety-specific finished production guidelines.
pH range	Genera-specific. Follow finished production guidelines.

TIPS

1. Plant Basewell young plants upon receipt.
2. If you cannot plant upon receipt, keep Basewell young plants fresh by storing in cool conditions with high humidity until ready to transplant.
3. Avoid extreme conditions (high light and/or temperature) immediately after transplant through root development to the side of the pot.
4. Once roots are to the side of the container, grow under normal finishing conditions for temperature, light, irrigation, fertilizer, pinching, and plant growth regulators.

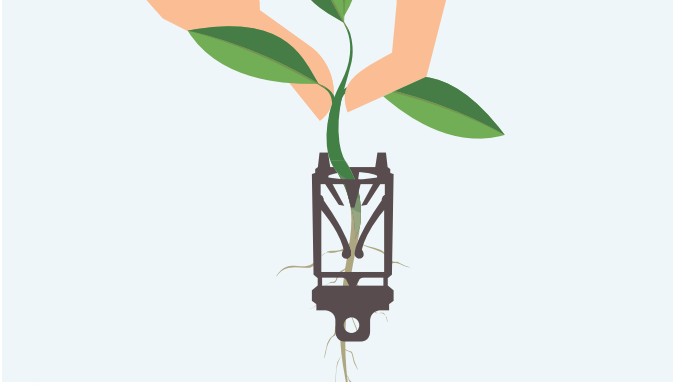

WE'RE HERE TO HELP YOU GROW

Basewell@DummenOrange.com

[GrowBasewell.com](https://www.growbasewell.com)

HOW TO PLANT BASEWELL™

STEP 1

- ▶ Grab the stem above the cartridge to avoid damaging the roots. This ensures your fingers won't displace soil next to the roots during planting. This is critical to maximize root-to-soil contact.

STEP 2

- ▶ Push the cutting into the media, with the top of the cartridge at soil level. Never use a pre-dibbled hole. This will cause air gaps between the roots and the media. Directly plant into the soil.

STEP 3

- ▶ Drench plants thoroughly to ensure good root to soil contact. Plants should be protected with shade or misted for the first 3-5 days.

THINGS TO AVOID

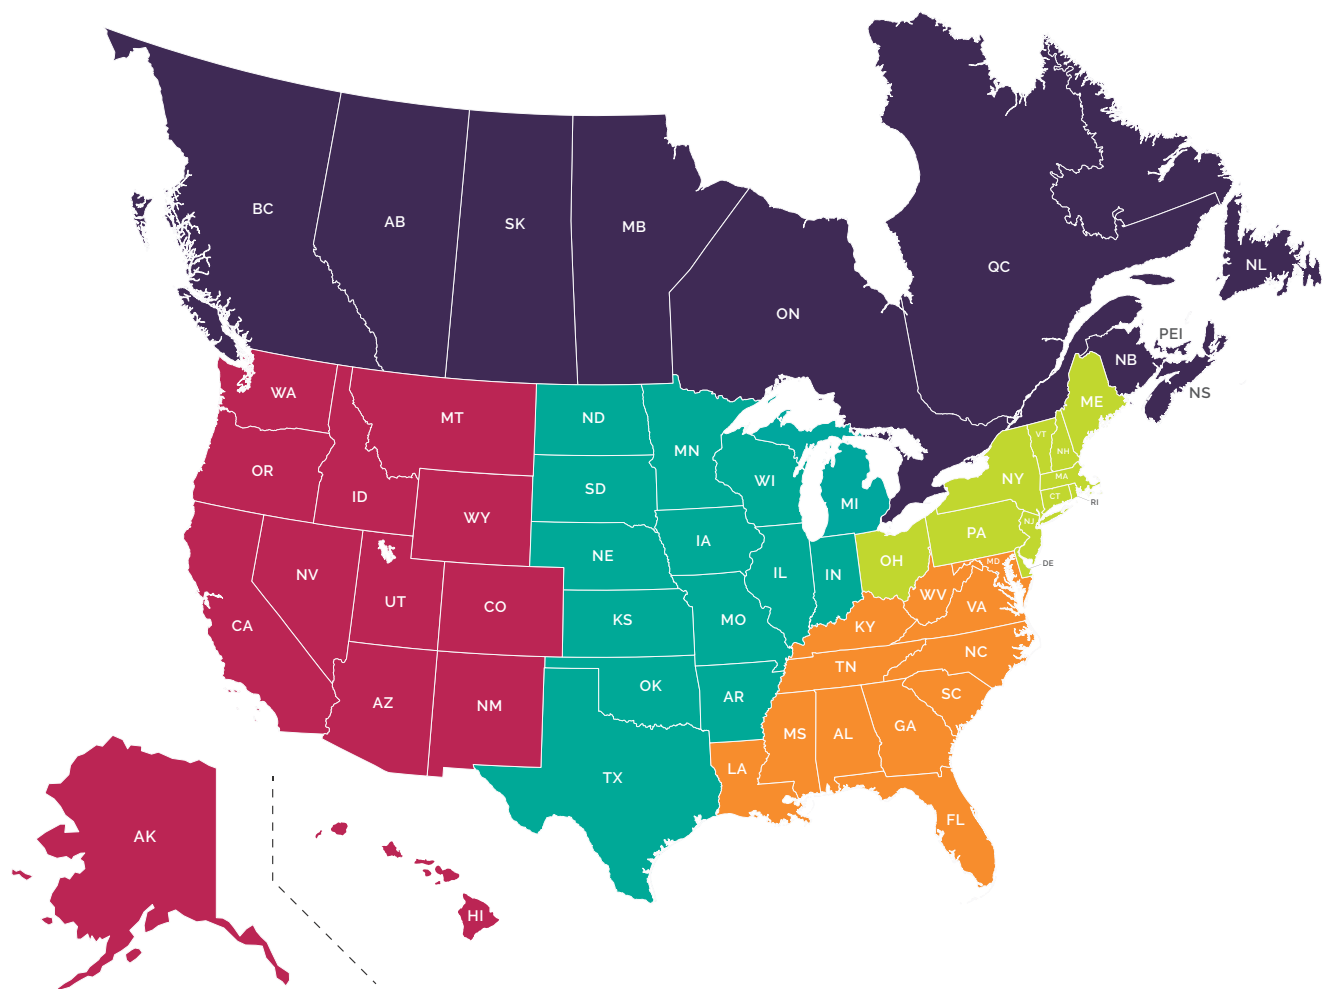

- ✗ **Do not create a dibble hole**, as it will leave too much air around the roots. Simply stick the cartridge into the soil like a dart.
- ✗ **Do not hold onto the cartridge**. Instead, grab the stem above the cartridge so that it makes direct contact with the soil and you avoid creating space around the cartridge.
- ✗ **Do not simply mist like a traditional unrooted cutting**. Soak in the plants so that the soil can penetrate the cartridge and adhere to the roots.
